entution ERP Product Capability Guide for SMEs

Driving the SMEs towards New Data Driven Culture

Are you Struggling with Erratic and Inaccurate Information, which causes Roadblocks to your **GROWTH**??

Entution SME ERP instrumentally helps small and medium businesses to effectively adapt to the technology to empower their digital transformation journey. It effectively unfolds many new meanings and expands dimensions of the business by optimizing the business processes, providing easy visibility of all operations with intelligent information. Entution SME ERP is a flexible and easily adaptable solution that seamlessly provides solutions for SMEs to overcome the above challenges.

Through the expertise we gained by serving a series of SMEs in various industry domains via our SME ERP, we understand the heartbeat of the SMEs and their critical challenges. We provide technical expertise and guidance to SMEs and work as a catalyst to uplift the growth potentials to explore new horizons.

Entution SME ERP comes with four Core / Base modules which are essential for SMEs to start their digital transformation journey; Sales & Invoicing, Purchasing, Inventory Management and Accounting and Finance combining intelligent business reporting layer with an array of informative decision driven dashboards with over 100+ KPIs.

Apart from the above core modules Entution offers industry specific modules extensions that can be applied on top of the core modules; Customer Relationship Management (CRM), Fixed Assets Management, Simple Manufacturing and Projects & Service Management.

How Entution ERP Help SMEs to Embrace Greater Growth Potential

Entution SME ERP seamlessly helps you to plan your resources better, reduce operational costs, eliminate wastages, improve inventory costs and increase process excellence.

Small and Medium Businesses can eliminate roadblocks to their growth by embracing globally accepted business processing practices introduced by Entution ERP.

Entution ERP offers better customer service by making sure that you get the necessary support to run the ERP smoothly in an optimum manner.

Better Financial operations lead to well-disciplined financial management practices with adequate controls.

Improved cash flows of the business operations.

It supports improving communication across departments, optimizing business processes and enables easy visibility of all operations.

Outdated legacy systems generate inaccurate information and unnecessary data islands where small and medium businesses find making well-informed decisions challenging. Entution ERP is a powerful data hub that allows businesses to collect, store, and analyze data seamlessly across all operations.

Entution ERP supports small and medium businesses to adapt to new 'Data Driven' operations with enhanced business reporting and real-time information.

Entution ERP makes you intelligent in making informed decisions by providing access to state-of-the-art smart KPIs and Business Intelligent reporting facilities.

Bileeta Entution at a Glance

The Entution Purchasing module allows you to place your Purchase Orders and track the process from goods reception to getting the supplier's final invoice. Through our stock reports and the dashboard, you will be able to examine the on-hand supplies of all items at any of your warehouse sites, as well as track product movement to detect slow-moving and fast-moving products. Furthermore, you will be able to efficiently oversee your overall suppliers and ensure that you pay your suppliers on time, follow-up on deliveries, and have visibility into your entire stock levels to minimize waste and stock holding expenses.

Entution Sales Module enables your sales staff to initiate a Sale Order and follow it through to delivery and invoice fulfillment. Based on the real-time information provided by our "Age analysis" reports and dashboards, the system enables you to oversee the overall debtor status and follow-up on all your collections on time. Further, you can apply automated credit control options to ensure that you can manage difficult customers with better control. These procedures gives you complete visibility and control over your overall sales operation and allows you to elevate your operation to the next level.

Accounting & Finance

Entution integrates all purchasing and sales processes in your company to the centralized Accounting & Finance Module, which is the core of your business processes. Entution will simultaneously handle financial aspects such as your general ledger, accounts payable, accounts receivable, cash management, and tax management to finally provide you with the company's Income statement, Balance Sheet and the Trial Balance. You will have real-time access to critical financial data, such as your profitability, operational costs and liabilities through our reports and the dashboard for strategic decision making.

Business Analytics

Entution enables your management team to easily monitor the overall organizational performance through its comprehensive, real-time Business Analytics and Information module, which analyzes strategic & operational business data related to each module as Procurement, Sales and Finance. Where it covers company's net and gross profitability, cost and expense analysis, sales, cash flow, debtor, creditor and inventory aging, on hand stock levels and furthermore which reflects the current status of your organization that will enhance the decision-making process.
